Annapurna Devi Atul Merchant 2021-11-22 Legendary musician Annapurna Devi's life has been shrouded in mystery.

Daughter of the unparalleled Allauddin Khan of Maitra and the first wife of Pandit Ravi Shankar, she conquered the summit of Indian classical music, only to later renounce public life to spend her entire life as a recluse in the confinement of her house. Until the age of sixteen, Annapurna Devi was confined to her family home at Maihar, where her father was a court musician and guru to the maharaja. During this period, she devoted herself exclusively to the deepest study and practice of Indian classical music under the strict tutelage of her father. After her estrangement from her husband Pandit Ravi Shankar, Annapurna Devi went ever deeper into self-imposed seclusion. The only people whom she met and communicated with were her disciples who used to visit her for music lessons, which included some of the greatest musicians our era has seen, including Pandit Nikhil Banerjee, Pandit Hariprasad Chaurasia, Ustad Bahadur Khan, Aashish Khan, Dhyanes Khan, Nityanand Haldipur and Basant Kabra, to name a few. Full of anecdotes and untold stories, this is her life story as told by her to her disciples over a period of time, giving valuable insights into their Guru

Ma's personality, music and teachings.

Green Signals Jairam Ramesh 2015-03-05 The debate on whether to privilege economic growth over ecological security is passé. Environmental considerations must be at the heart of economic growth, especially for a country of 1.25 billion people destined to add another 400 million by the middle of the century. Green Signals chronicles the '1991 moment' in India's environmental decision-making, telling the story of how, for the first time, the doors of the environment ministry were opened to voices, hitherto unheard, into the policy-making process. It details efforts to change the way environment is viewed both by proponents of environmental security and those who prize economic growth at all costs. Told from the perspective of a pivotal decision maker, the book addresses the challenges involved in trying to ensure economic growth with ecological security. It takes us through India's coming of age in the global environmental and climate change community to take on a leadership role that is progressive, proactive, and steeped in national interest. Using speaking orders on high-profile projects, notes and letters to the Prime Minister, ministerial colleagues, chief ministers and others, Jairam Ramesh gives an insight into the debates, struggles, challenges, and obstacles to bringing environmental considerations into the mainstream of political and economic decision-making. This collection reveals the story of the author's attempt at the highest levels of governance to introduce effective decision-making, a transparent and accountable administration, and to make environmental concerns an essential component of a nation's quest to accelerate economic growth and end the scourge of poverty and deprivation.

Disciplined Minds Jeff Schmidt 2001-12 This book details the battle one must fight to be an independent thinker, showing how an honest reassessment of what it means to be a professional in today's corporate society can be remarkably liberating. Poignant examples from the world of work reveal the workplace as a battleground for the very identity of the individual. Schmidt contends that professional work is inherently political—that the unstated duty of professionals is to maintain strict "ideological discipline." Career dissatisfaction evolves as workers lose control over the political component of their creative work. After reading this insightful book, no one who works for a living will ever think the same way about their job. Jeff Schmidt lives in Washington, D.C., where he is an editor for Physics Today.
